

## Information sheet spare parts

We supply spare part brake cylinder, single parts and seal kits.  
But also we repair older units produced by SAFIM.

To make us able to help you, we need just part number of SAFIM – product.

You will find it following this instruction:

- Look to find type plate and tell us all data you found  
or
- Look to find part number stamped into rear or side body of component ( please, remove painting carefully, if necessary).

In case, you cannot find this data do like following:

- Measure diameter of piston and stroke of master cylinder
- IMPORTANT : Inform about fluid you use to brake:  
DOT 3/ DOT 4 or mineral oil
- and take pictures, if possible.

Send all this information to us, best is to use this mail adress:

mail@omnihydraulik.de

We check immediately, how we can help!

Example how part numbers look like:
